

# European Project Semester 2021

## «Crowd Orchestration»

We aim to orchestrate the crowd at festivals with our scanner and application

### Scanner

Place a phone next to the ScanGo scanner, The NFC module redirects to the ScanGo application

### Application

Gives access to a map updated in real time, and helps prioritise activities (stages, food, photo, WC)

### Packaging

Allows easy opening/closing and can be reused for transport to a new festival

### Solar Panel

Allows the scanner to be charged by solar energy
